YUHONG'S DIGEST

To be the most valuable global enterprise
in the construction materials industry

Founded in 1995, Oriental Yuhong, over the past 20 plus years, has been devoted to providing high-quality waterproofing system solutions for tens of thousands of major infrastructures and industrial, civil and commercial buildings. Having grown into a leading service provider in the construction and building materials industry.

The company went public in 2008 and its operating revenue exceeded CNY 31.2 billion in 2022, 44 times that of 2008.

The products of company are exported to more than 100 countries and regions such as Germany, Brazil, Australia, America, Canada, Russia, Japan, Singapore, South Korea, Central Africa and South Africa.

CORPORATE CULTURE

To be the most valuable global enterprise
in the construction materials industry

COMPANY TENET

CREATE VALUE FOR NATION, SOCIETY, CUSTOMERS,
EMPLOYEES AND SHAREHOLDERS.

COMPANY MISSION

TO CREATE SUSTAINABLE AND SAFE ENVIRONMENT
FOR HUMAN SOCIETY.

COMPANY VALUES

GENUINENESS, EXCELLENCE, ELEGANCE.

GUIDING IDEOLOGY

RETURN FOR NATION, SERVICE TO PEOPLE.

SUSTAINABLE DEVELOPMENT

To be the most valuable global enterprise
in the construction materials industry

Responsibilities build up the future

Publishing social responsibility/sustainable development reports for 15 consecutive years

Promote the high-quality development of the industry

Enter the market with strong self-discipline, adhere to the principle of quality first, constantly deliver high-quality products and services, and create a healthy and fair development environment with practical actions.

Explore the development path of carbon neutrality

Innovate research and development, build clean and green plants, implement green and intelligent construction techniques, promote green products, and build resource-saving and environment-friendly enterprises.

Interact with the society in a beneficial cycle

Organize special charitable activities in the fields of charity, education, and poverty alleviation, act quickly in social emergencies, and assume corporate responsibilities.

RESEARCH AND INNOVATION

To be the most valuable global enterprise in the construction materials industry

Nationally accredited/platform

National Technological Innovation Demonstration Enterprise, National High-tech Enterprise, Nationally Accredited Enterprise Technology Center and Postdoctoral Scientific Research Workstation

Only one in the industry

Approved to establish the State Key Laboratory of Special Functional Waterproof Materials

First in the industry

Second Prize of State Science and Technology Progress Award

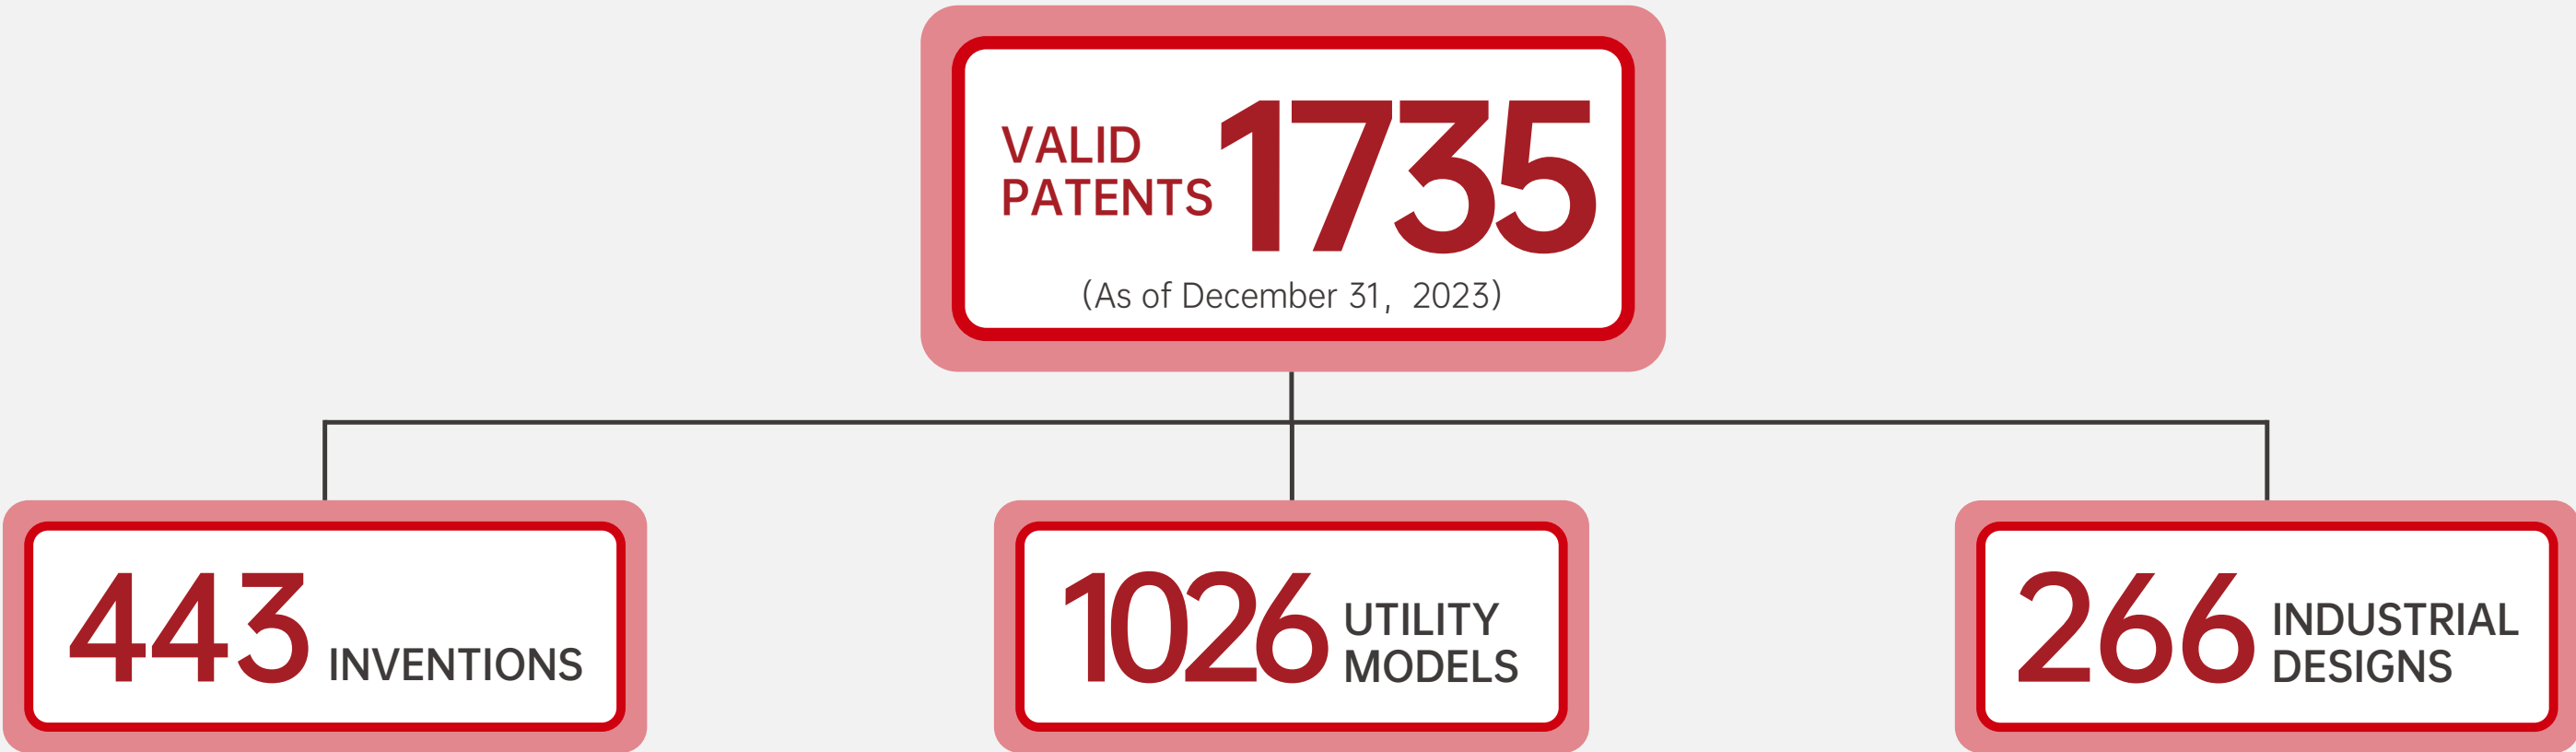

Four R&D centers

Product R&D, application technology, production process equipment and engineering construction technology

Overseas R&D

Establishing "Oriental Yuhong Global Excellence Research Center of Waterproof Coatings" in Philadelphia, the United States.

Establishing scientific research cooperation with Lehigh University, Simon Fraser University in Canada, Stanford University, Gunma University and Kyushu University

It has 17 valid overseas patents, and has been granted patent authorization and authoritative certification by the United States, Singapore, Germany, the United Kingdom, Australia, etc.

INTELLIGENT MANUFACTURE

To be the most valuable global enterprise
in the construction materials industry

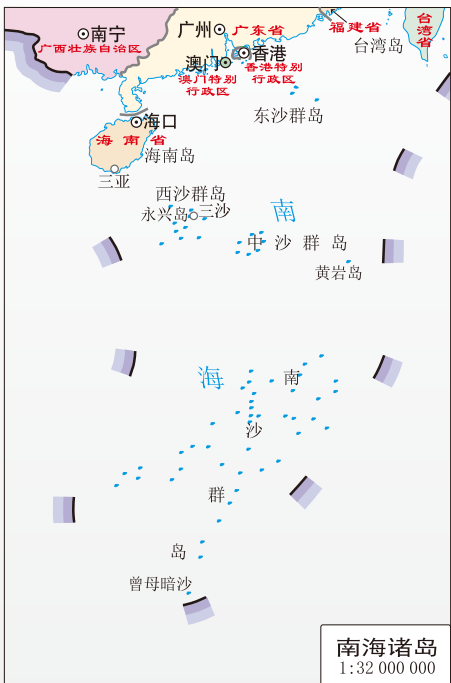

National planning: More than **64** production, R&D and logistics bases, efficiently realizing "a **24-hour** delivery within a coverage of **300km**"

Plants in operation (57)

Factories under construction (7)

INTELLIGENT MANUFACTURE

To be the most valuable global enterprise
in the construction materials industry

New ecology of intelligent industry integrating
"automation, digitization, lean management, integration and intelligence"

Intelligent production line

Oriental Yuhong has more than 200 advanced production lines. It has brought in the R&D modified asphalt production line, the Boato coiled material production line and the Krauss Maffei production equipment from the United States, Italy and Germany, respectively. By importing sophisticated equipment and advanced instruments, it aims to ensure high quality.

Intelligent warehousing

Through the integration of computer operation, scheduling, statistics, analysis and management, automatic processing is realized in the whole process from production line labeling and code scanning for warehousing to finished product ex-warehouse and from vehicle number calling to logistics tracking.

Intelligent supervision

Carry out prevention and production control by information and digital means, and build a coordinated system for the whole supply chain management of products.

东方雨虹 ORIENTAL YUHONG

PROFESSIONAL SERVICES

To be the most valuable global enterprise in the construction materials industry

Standardized Management System

The first one in the industry to create the "standardized construction management system" integrating **construction standardization, equipment modernization, training professionalization and construction safety.**

The system covers a wide range of aspects including process, construction method, atlas, tools and construction management, forming a standardized whole-chain service.

01

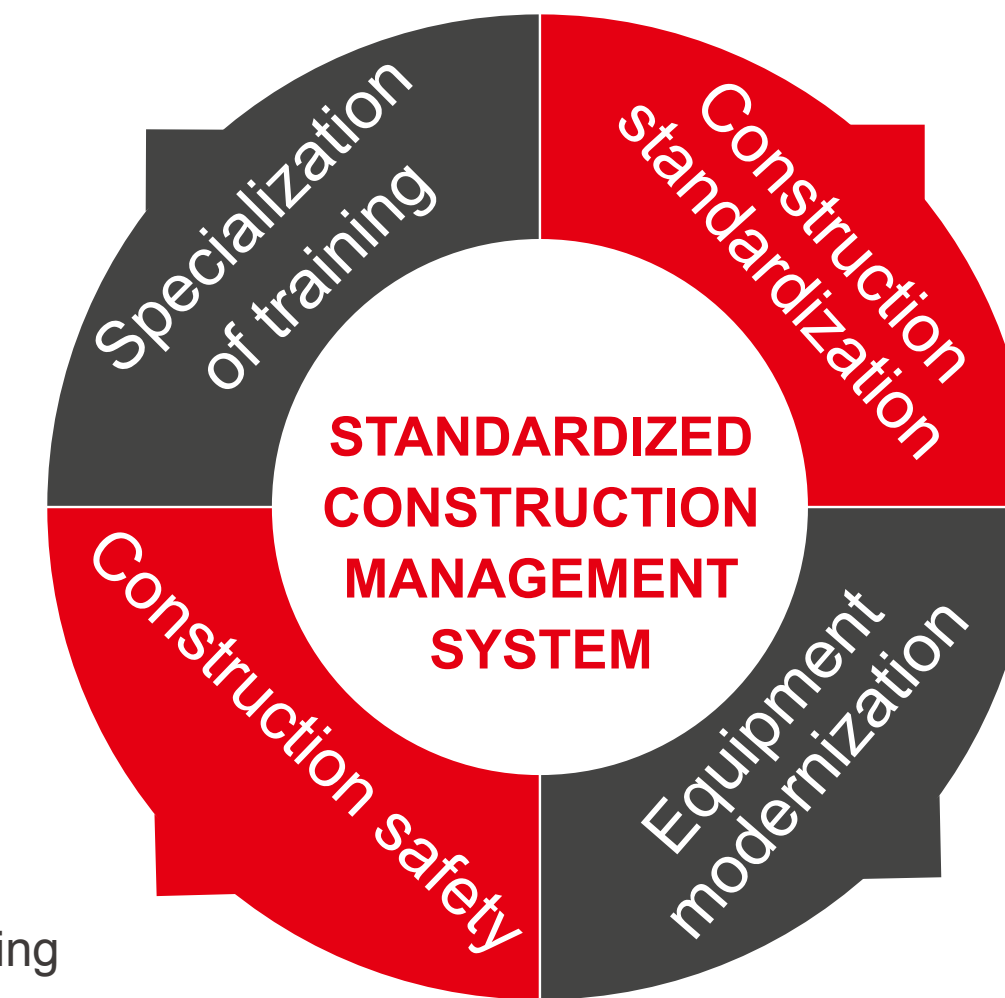

- Oriental Yuhong Vocational Training School
- Training for management personnel
- Training of construction personnel

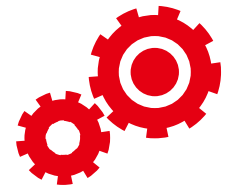

04

- Security Awareness Training
- On-site warning is in place
- Adequate safety facilities

02

- Management standardization
- Process standardization
- Process standardization

03

- Modernization of construction machinery
- Automation of construction machinery
- Convenience of construction tools

Standardized full-chain services

Pre-job Training

Construction Arrangement And Deployment

Model Demonstration

Standardized Construction Equipment

Site Management

Safety First

Real-time Engineering Tracking

PROFESSIONAL SERVICES

To be the most valuable global enterprise
in the construction materials industry

High-quality Technical Talents Matrix

Building Oriental Yuhong Vocational Skills Training School to train technical talents for the industry.

1 The first vocational skills training school with a national private school license in the industry.

1 The first and only institution in the industry to obtain the qualifications of Beijing social training evaluation organizations.

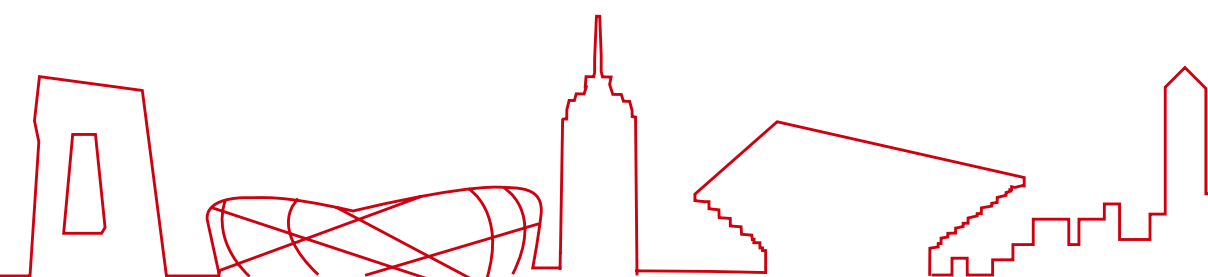

Conducting vocational skill level identification and training in **11 categories** and **19 types of work** and having provided **880,000** training opportunities in total.
